

# DID YOU KNOW?

In the 2016 Presidential Election:

- The voter turnout rate of people with disabilities was 6% lower than that of people without disabilities
- The voter registration rate of people with disabilities was 2% lower than that of people without disabilities
- If people with disabilities had voted at the same rate as people without disabilities who have the same demographic characteristics, there would have been about 2.2 million more voters
- People with disabilities accounted for 16.67% of eligible voters, totaling 35.4 million people
- There were 62.7 million eligible voters who either have a disability or have a household member with a disability, more than 25% of the total electorate
